THE Cuban revolution is not suppressed yet. The insurgents have a powerful ally in the vellow fever, which thins the ranks of the newly arrived Spanish soldiers so rapidly that the troops are practically powerless. Every insurgent loss is repaired at once, and the wearing and wasting campaign goes steadily on to one inevitable issue. Spain is using the "Queen of the Antilles" as a cemetery for her soldiers; it bids fair to become the grave of her pride.

According to a late English parliamentary return, there were on the 1st of January, 1875, in the several union workhouses in England and Wales, fifty four thousand and eighty-eight men. sixty-seven thousand three hundred and seventy women, and forty-four thousand six hun leed and thirty four children.
